**Regulatory Docket File**

September 19, 1975

Mr. Benard C. Rusche, Director  
 Office of Nuclear Reactor Regulation  
 U.S. Nuclear Regulatory Commission  
 Washington, D.C. 20555

**Subject:** Dresden Station Units 2 and 3  
 Quad-Cities Station Units 1 and 2  
 Proposed Change to Operating Licenses  
 DPR-19, DPR-25, DPR-29, and DPR-30  
 NRC Docket Nos. 50-237, 50-249  
 50-254, and 50-265

Dear Mr. Rusche:

Approval of a proposed change to Appendix A of DPR-19, DPR-25, DPR-29, and DPR-30 is requested pursuant to Part 50.59 of 10 CFR 50.

The proposed change will eliminate license requirements for jet pump flow indication and bring the current Technical Specification in conformance with the proposed Standard Technical Specifications.

Flow indications are worthwhile but not a necessity. Comparison of the data with a normal relationship or pattern provides the indication necessary to detect an inoperable jet pump. Agreement of indicated core flow with established core plate AP to core flow relationship provides the most assurance that recirculation flow is not bypassing the core through inoperable jet pumps.

This proposed change to the Technical Specifications has received Onsite and Offsite Review and approval and is indicated on the attached revised pages 91 and 99 for Dresden Units 2 and 3 and 120 and 141 for Quad-Cities Units 1 and 2.

Response to this request is needed by January 2, 1976. Three (3) signed originals and 37 copies of this proposed change and modification are provided for your use.

Att.

Very truly yours,

SUBSCRIBED and SWORN to  
 before me this 19<sup>th</sup> day  
 of September, 1975.
