RE: High Energy Line Break Analysis for Dresden Station, Units
2 & 3 and Quad-Cities Station, Units 1 & 2

Gentlemen:

In our review of your high energy line break reports, Special Report #37, Revision 1 and Special Report #12, Revision 1 for Dresden Units 2 & 3 and Quad-Cities Units 1 & 2, respectively, we have progressed to that point where we now require more information on the nature of the modifications indicated in those reports. Specifically, the information required is that set forth in items 5 and 6 of the "General Information Required for Consideration of the Effects of a Piping System Break Outside Containment," which was sent to you as an enclosure to our original high energy line break letter, dated December 14, 1972, and December 18, 1972, for the Dresden and Quad-Cities Stations, respectively.

It is our understanding that the design of these modifications is essentially complete and that CECo is procuring the necessary materials to complete the modifications during scheduled plant outages.

You are therefore requested to submit the modification design information described above within 30 days of your receipt of this letter. For those designs which are not complete, please inform us of when the design information can be provided. In your reply, one signed original plus thirty-nine additional copies will be required for each of the two stations.

Sincerely,
Original signed
Richard D. Silver for
Dennis L. Ziemann, Chief
Operating Reactors Branch #2
Division of Reactor Licensing
