December 4, 1975

Director of Nuclear Reactor Regulation  
Attn: Mr. Dennis L. Ziemann, Chief  
Operating Reactors - Branch 2  
Division of Reactor Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

**Subject: Description of Commonwealth Edison Techniques  
for Developing Rod Withdrawal Sequences  
NRC Docket No. 50-249 (Dresden Unit 3)**

Dear Mr. Ziemann:

In accordance with Section 2.790 of 10 CFR Part 2, the subject report should be labeled proprietary and withheld from public disclosure.

The document represents a technique developed by Commonwealth Edison Company for its sole use. The analyses performed in support of the technique were executed on codes held proprietary by Commonwealth Edison Company and General Atomic Company. Release to the public of the details of these codes would violate agreements between Commonwealth Edison Company and its vendors.

Please contact this office if you have additional questions.

Very truly yours,

G. A. Abrell  
Nuclear Licensing Administrator  
Boiling Water Reactors
