Subject: Hydrogen Control Equipment - Dresden Units 2 and 3

Dear Dr. Morris:

This is in response to a letter of August 3, 1971 in which you requested that we submit a detailed design and schedule for the installation of a hydrogen control system which would meet the requirements of Safety Guide No. 7.

Attached is a report entitled, "Dresden Nuclear Power Station, Unit 3, Supplement to Special Report No. 14." This report gives a conceptual design of a system to control hydrogen which meets Safety Guide No. 7.

We would like to discuss this report with you and obtain your approval of this concept. Following this approval, we will submit to you a detailed design and schedule for the installation of the equipment.

In addition to three signed originals, 19 copies of this supplement are also submitted.

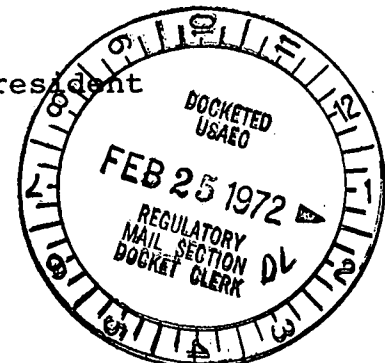

Very truly yours,

Byron Lee Jr.

Byron Lee, Jr.
Assistant to the President
