Regulatory Docket File

45 cyp

September 3, 1974

Mr. James G. Keppler  
 Regional Director  
 Directorate of Regulatory  
 Operations - Region III  
 U.S. Atomic Energy Commission  
 799 Roosevelt Road  
 Glen Ellyn, Illinois 60137

Subject: Dresden Station Unit 3 Primary  
 Containment Integrate Leak Rate Test  
 Report AEC Docket 50-249

Dear Mr. Keppler:

Attached is a report describing the Dresden Unit 3 primary containment leak rate test which was performed during the second refueling in May, 1974 and is the first in the sequence of integrated leak rate tests required by technical specification 4.7.A.2.d. The test was conducted in accordance with technical specification 4.7.A.2 as revised by Change No. 14 dated November 26, 1973. The calculated leakage was 0.2839% per day which is well within the technical specification limit ( $l_{to}$ ) of 1.2% per day.

One copy of this report is submitted for your use and 39 copies are transmitted to the Acting Director, Directorate of Licensing by copy of this letter.

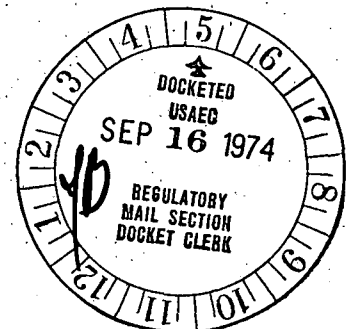

Very truly yours,

*J. S. Abel*
