MEMORANDUM FOR: Victor Stello, Jr.  
 Executive Director for Operations

FROM: Thomas E. Murley, Director  
 Office of Nuclear Reactor Regulation

SUBJECT: CLOSEOUT OF GENERIC ISSUE HF-08  
 "MAINTENANCE AND SURVEILLANCE PROGRAM"

The objective of this Generic issue was to initiate the NRC's efforts to assure effective nuclear power plant maintenance in accordance with the 1984 Policy and Planning Guidance. This included a description of the problems and issues to be addressed and an evaluation of the alternative NRC approaches to regulate nuclear utility maintenance activities.

In 1985, a NRC Maintenance and Surveillance Program Plan was developed. Activities included a survey of current maintenance practices and an evaluation of their effectiveness. These activities were completed in 1986 and are documented in NUREG-1212, "Status of Maintenance in the U.S. Nuclear Power Industry, 1985."

Subsequently the staff has developed a proposed Policy Statement on maintenance. In a Staff Requirements Memorandum dated February 25, 1988, the Commission approved a modified Policy Statement which was published in the Federal Register on March 23, 1988. In addition, the Commission also directed the staff to develop a proposed notice of rulemaking for Commission review in 1988. In addition, maintenance will be the area of emphasis for core team inspections over the next 2 years.

Based on the above activities, the staff considers the objectives of this Generic Issue satisfied and recommends that this Generic Issue be closed out.
