RE: Extension request, Willow Creek 1st Half 2017 Semi-Annual Effluent Report

Scott:

Submitting the Willow Creek 1st Half 2017 Semi-Annual Effluent Report on September 8, 2017, is acceptable. You state in your e-mail that the analytical results will not be received by Uranium One until September 8, 2017, the same date you are planning to send in the report. If you need an additional week, until September 15, 2017, to get the data into the report and sent to us, that is acceptable as well. Thank you for keeping us informed.

Ron

Subject: [External_Sender] 1st Half 2017 Semi-Annual Effluent Report Willow Creek

Ron

As discussed with you today during our phone conversation Uranium One has the first semi-annual effluent report for Willow Creek ready for submittal. The report is missing the environmental air particulate data from Irigaray, as analytical results will not be received by Uranium One until September 8, 2017 based on conversations with our contract laboratory.

From our discussions NRC's preference would be that Uranium One submit the effluent report once all the analytical data has been received and include this data with the current report rather than have this information sent as supplemental data or included in the second half effluent report.

Uranium One is hereby requesting that the first half semi-annual report submittal be extended until September 8, 2017 to allow for environmental air particulate data to be incorporated into the data tables with this report submittal.

If you have any questions or need additional information regarding this matter please let me know.

Regards,

Scott Schierman | HSE Manager
