JAN 25 1979

Dear Mr. White:

Your letter of January 10, 1978, responded to our September 26, 1977, letter requesting that you "... provide an analysis of the potential for and consequences of boron dilution accidents ..." for the R. E. Ginna Nuclear Power Plant. We have reviewed the information provided. Your submittal addresses only the potential for boron dilution through inadvertent draining of the spray additive tank to reactor coolant system, as has occurred at the Crystal River Nuclear Power Plant. To complete our review, please identify by February 23, 1979, all of the boron dilution mechanisms that could occur at the R. E. Ginna Nuclear Power Plant in accordance with the guidelines provided in our letter. Include an analysis or a schedule for analysis of each boron dilution accident that has not been documented previously.

Sincerely,

Original signed by  
Dennis L. Ziemann  
Dennis L. Ziemann, Chief  
Operating Reactors Branch #2
