Docket No. 50-244

DEC 06 1979

Mr. and Mrs. James Barletta
135 Beresford Road
Rochester, New York 14610

Dear Mr. and Mrs. Barletta:

Thank you for your correspondence concerning the Ginna Plant as related to the accident at Three Mile Island Nuclear Station, Unit 2.

I regret that this reponse has been delayed. The accident and its consequences have created a substantial increase in the agency's workload, which has prevented us from responding to you as promptly as we would have wished.

NRC appreciates your concerns about nuclear power and we hope that the enclosed document will provide you with additional information concerning the effects of the Three Mile Island accident on the safety considerations at other nuclear power plants. Each of the plants is being reviewed against the requirements of this document

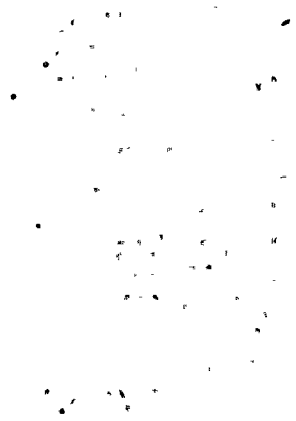

Sincerely,

[Signature]
Harold R. Denton, Director
Office of Nuclear Reactor Regulation

Enclosure: NUREG-0578

A little light
on this subject.

4/1/79

In view of the catastrophe at
Harrisburg, we urge that you reexamine
all aspects of safety precautions before
allowing Ginna Nuclear Power to reopen.

Sincerely,

Alice and James Barletta
