MEMORANDUM FOR: Dennis L. Ziemann, Chief
 Operating Reactors Branch #2
 Division of Operating Reactors

FROM: G. Lainas, Chief
 Plant Systems Branch
 Division of Operating Reactors

SUBJECT: SAFETY EVALUATION OF PLUTONIUM-URANIUM OXIDE FUEL
 ASSEMBLIES IN SPENT FUEL STORAGE RACK

Plant Name: R.E. Ginna Nuclear Power Plant, Unit 1
 Docket No.: 50-244
 TAC No.: 12462
 Project Manager: J. Shea

Enclosed is the Plant Systems Branch input to the Safety Evaluation Report for the Rochester Gas and Electric Corporation's (RG&E) proposed storage of four plutonium-uranium, mixed oxide, fuel assemblies in the R.E. Ginna spent fuel pool.

We have reviewed the issue of criticality as it is discussed in the licensee's submittal which supports its proposed amendment to the facility's operating license. We find RG&E's application for the license amendment acceptable for this issue.

This completes PSB, Section B's effort on the above TAC task.
