Subject: [External_Sender] considering SUC-1593 under 2.206

Hello Ms. Snyder,

Thank you for your e-mail of April 5, 2017.

My letter of March 16, 2017 to the Executive Director of Operations regarding the License SUC-1593 was a bit more than just commentary. I had hoped that NRC would recognize the shortcomings and inaccuracies of the License SUC-1593 and on their own initiative conduct a review. Because that does not seem to be an option, and following your suggestions, you may consider my letter a "2.206 petition" to institute a proceeding pursuant to 10 C.F.R.2.202.

Within the next few days, I will focus on the concerns I expressed and send the NRC that information. Please inform me if you have been designated the contact person by the EDO or should I continue to consider the EDO as the point of contact.

Sincerely,

G.Michael Reimer, Ph.D.

Retired Geologist
