

APPENDIX A

NOTICE OF DEVIATION

Rochester Gas and Electric Corporation
License No. DPR-18

Docket No. 50-244

Based on the results of an NRC inspection conducted on March 3, 1980 to March 7, 1980, it appears that one of your activities was not conducted in full compliance with commitments made to the commission as indicated below.

In response to NUREG-0578, Section 2.1.9 "Analysis of Design and Off-Normal Transients and Accidents" your letter to the Director of Nuclear Reactor Regulations dated October 17, 1979 stated "We will develop plant specific procedures and train personnel on the new procedures". It is intended that the guidelines provided by October 31, 1979, will be incorporated into plant procedures and training accomplished by the required date of January 1, 1980.

Contrary to the above, review of records and personnel interviews conducted on March 4-6, 1980 revealed that out of a total of 37 licensed operators, 14 had not attended the prescribed training sessions and 4 others had only partially attended.
