

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

June 13, 1980

Docket No. 50-244

Mr. Leon D. White, Jr.  
Vice President  
Electric and Steam Production  
Rochester Gas and Electric Corporation  
69 East Avenue  
Rochester, New York 14649

Dear Mr. White:

The Commission has issued the enclosed Amendment No. 33 to Provisional Operating License No. DPR-18 for the R. E. Ginna Nuclear Power Plant. This amendment is in response to your application dated March 7, 1980 (which was transmitted by letter dated March 12, 1980).

The amendment adds a new license condition which approves implementation of a secondary water chemistry monitoring program, effective June 30, 1980.

During further review of this generic issue we found it to be more appropriate to approve the implementation of this program by incorporating a license condition in the license rather than issuing technical specification provisions. We have discussed this change with your representative and we have mutually agreed upon it.

Copies of our related Safety Evaluation and the Notice of Issuance are also enclosed.

Sincerely,

  
Dennis M. Crutchfield, Chief  
Operating Reactors Branch #5  
Division of Licensing
