Mr. Leon D. White, Jr.
 Vice President
 Electric and Steam Production
 Rochester Gas & Electric Corporation
 89 East Avenue
 Rochester, New York 14649

Dear Mr. White:

SUBJECT: INADVERTENT SAFETY INJECTION DURING COOLDOWN (GINNA)

We have completed a generic review on this subject and conclude that no further licensing action is necessary at this time since it is likely that a facility could withstand more than fifty inadvertent ECCS actuations. We have concluded, however, that it would be prudent, should your facility experience more than twenty-five such injections, for you to consider a plant specific analysis for Ginna which would identify more precisely the additional number of actuations that can be safely accommodated at that facility.

A copy of our Safety Evaluation is enclosed for your information.

Sincerely,

Dennis M. Crutchfield, Chief
 Operating Reactors Branch #5
 Division of Licensing
