Docket No. 50-244

Rochester Gas and Electric Corporation  
ATTN: Mr. Robert C. Mecredy  
General Manager  
Nuclear Production  
49 East Avenue  
Rochester, New York 14649

Gentlemen:

Subject: Resident Inspection 50-244/89-15 (10/11/89 - 11/6/89)

This letter forwards the report of the above subject inspection of the R. E. Ginna Nuclear Power Plant. At the conclusion of the inspection, Mr. N. Perry of my staff discussed the inspection findings with Mr. S. Spector and other members of your staff.

The inspection found that the Human Performance Evaluation System reports completed during this inspection period were thorough and adequately assessed two events including a spill of boric acid solution and a spill of spent fuel pool water from a left open pump vent valve. However, these events indicate a continuing weakness in establishing proper system alignments and in the associated independent verification thereof. You are requested to respond in writing to these concerns within 45 days of receipt of this report, describing your additional corrective actions on these matters.

Thank you for your cooperation.

Sincerely,

**ORIGINAL SIGNED BY**

Jon R. Johnson, Chief  
Projects Branch No. 3  
Division of Reactor Projects
