Docket No. 50-244

Rochester Gas and Electric Corporation (RG&E)
ATTN: Dr. Robert C. Mecredy
Vice President, Ginna Nuclear Production
89 East Avenue
Rochester, New York 14649

Dear Dr. Mecredy:

Subject: R. E. Ginna Resident Inspection 50-244/91-15 (6/25/91 - 8/12/91)

From June 25 to August 12, 1991, the NRC Region I staff conducted a routine safety inspection at your facility. We have documented the results in the enclosed report. At the end of the inspection, Mr. T. Moslak of my staff summarized the findings with Mr. T. Marlow and other members of your staff.

The inspection examined in particular the control of operational and maintenance activities conducted during this period. Within these areas, site management's initial response to resolving issues related to the circuit card failures in the Undervoltage Monitoring/Protection System were found to be comprehensive. Additionally, measures taken to expand the Erosion/Corrosion Program to include categories of small bore piping susceptible to wall thinning was considered prudent.

No response to this letter is required. Thank you for your cooperation.

Sincerely,

Original Signed By:
Ebe C. McCabe

James C. Linville, Chief
