Docket No. 50-244

Dr. Robert C. Mecredy Vice President, Nuclear Production Rochester Gas and Electric Corporation 89 East Avenue Rochester, New York 14649

Dear Dr. Mecredy:

SUBJECT: CLOSURE OF GENERIC LETTER 91-06, "RESOLUTION OF GENERIC ISSUE A-30,

ADEQUACY OF SAFETY-RELATED DC POWER SUPPLIES" - GINNA NUCLEAR POWER

PLANT (TAC NO. M81444)

On April 29, 1991, the Nuclear Regulatory Commission (NRC) issued Generic Letter (GL) 91-06, "Resolution of Generic Issue A-30, Adequacy of Safety-Related DC Power Supplies." The GL implemented the NRC staff's resolution of Generic Issue (GI) A-30 as part of the resolution of GI 128, "Electrical Power Reliability." The GL requested that licensees provide written responses to several questions to allow the NRC staff to determine whether any additional actions were required.

By letter of October 28, 1991, you submitted certified responses to each of the questions of GL 91-06, as requested. The NRC staff has reviewed these responses and finds that they satisfy the reporting requirements of the GL. This completes NRC action with respect to GL 91-06. TAC No. M81444 is hereby closed.

Sincerely,

Allen R. Johnson, Project Manager Project Directorate I-3 Division of Reactor Projects - I/II Office of Nuclear Reactor Regulation
