

APR 01 1986

Docket No. 50-244

Mr. Roger W. Kober, Vice President
Electric and Steam Production
Rochester Gas & Electric Corp.
89 East Avenue
Rochester, New York 14649

Dear Mr. Kober:

By letter dated November 22, 1982 you responded to an NRC request regarding the radiological consequences of a steam generator tube rupture (SGTR). We opened TAC No. 49341 for the review of your submittal. However, we have subsequently incorporated the safety consequences of SGTR into our review of a Technical Specification change you requested on February 18, 1983 which concerns an increase in allowable reactor coolant activity. This review is being conducted under our TAC No. 49899. Therefore, this letter serves to close out our earlier TAC No. 49341. All further review will be conducted and charged under TAC No. 49899. Our target date for completion of this review is October 15, 1986.

Sincerely,

MS

Morton B. Fairtile, Project Manager
Project Directorate #1
Division of PWR Licensing-A
