

24 APR 1986

Docket No. 50-244

Rochester Gas and Electric Corporation
ATTN: Mr. Roger W. Kober
Vice President
Electric and Steam Production
49 East Avenue
Rochester, New York 14649

Gentlemen:

Subject: Inspection 50-244/86-06

This refers to the routine safety inspection conducted by Mr. W. A. Cook and Mr. T. K. Kim of this office on March 1, 1986 through March 31, 1986 at the R. E. Ginna Nuclear Power Plant of activities authorized by NRC License No. DPR-18 and to the discussions of our findings by Mr. Cook with Mr. S. M. Spector and other members of your staff periodically during the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel and observations by the inspectors.

Based on the results of this inspection, no violations were observed. However, inspector review of the low Power Physics Testing Program indicates that your test procedures lack clarity and completeness. Although the tests were properly performed, the documentation of test results and procedural reviews does not appear consistent with site review practices. The resident inspector will follow-up on actions to improve this area in a future inspection.

No response to this letter is required.

Your cooperation is appreciated.

Sincerely,

Original Signed By:

Samuel J. Collins, Chief
Projects Branch No. 2
Division of Reactor Projects
