

17 DEC 1986

Docket No. 50-244

Rochester Gas and Electric Corporation
ATTN: Mr. Roger W. Kober
Vice President
Electric and Steam Production
49 East Avenue
Rochester, New York 14649

Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP) Report
No. 50-244/85-99

This refers to the evaluation we conducted on August 4, 1986 of the performance of activities at the R. E. Ginna Nuclear Power Plant. This report was discussed with you at a meeting on October 7, 1986 at your corporate offices in Rochester, New York. Your written comments on our report have been reviewed and are enclosed. Some changes have been made in the SALP report to reflect the additional information provided and these are noted in the enclosed report.

Our overall assessment of your facility operation concludes there is effective management attention, oriented towards nuclear safety in all functional areas. However, notwithstanding the good performance noted in this SALP period, we have observed an attitude of informality in station activities which requires management attention before it affects performance. We acknowledge your comments on this subject included as Attachment A to your letter of October 28, 1986.

We acknowledge your comment on Section IV.B, Radiological Controls, that corporate ALARA Policy statements were issued on December 21, 1978 and July 1, 1984. The text has been revised to indicate that a formal proceduralized corporate ALARA policy was not in place until early 1986.

No reply to this letter is required. Your actions in response to the NRC Systematic Assessment of Licensee Performance will be reviewed during future inspections of your licensed facility.

We appreciate your cooperation.

Sincerely,

Original signed by
Thomas E. Murley
