DOMINION ENERGY KEWAUNEE, INC.
KEWAUNEE POWER STATION
TECHNICAL REQUIREMENTS MANUAL CHANGES

Pursuant to 10 CFR 50.71(e), Dominion Energy Kewaunee, Inc. (DEK) hereby provides a report of changes to the Kewaunee Power Station (KPS) Technical Requirements Manual (TRM) that were implemented without prior NRC approval. The KPS TRM is a part of the Updated Safety Analyses Report (USAR) by reference and therefore subject to 10 CFR 50.71(e).

DEK previously was similarly required to submit a report of changes to the KPS Technical Specifications (TS) Bases that were implemented without prior NRC approval. However, that requirement had been contained in TS 5.5.12, "Technical Specifications (TS) Bases Control Program," which was deleted by License Amendment 220 (Reference 1). That amendment also deleted the KPS TS Bases in their entirety.

The attachments provide copies of the TRM pages and TRM current page list reflecting the changes implemented since the last report (March 2016).

The changes to the TRM were made in accordance with the provisions of 10 CFR 50.59 and approved by the KPS Facility Safety Review Committee.

Please contact Mr. Jack Gadzala at 920-388-8604 if you have questions or require additional information,

Buddy J. Yuen for

Stewart J. Yuen
Manager, Kewaunee Power Station
