Gentlemen:

Subject: Inspection 50-244-85-24

This refers to the routine safety inspection conducted by Mr. W. A. Cook of this office on October 20, 1985 through November 30, 1985 at the R. E. Ginna Nuclear Power Plant of activities authorized by NRC license No. DPR-18 and to the discussions of our findings by Mr. Cook with Mr. S. M. Spector and other members of your staff periodically during the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel and observations by the inspector.

Within the scope of this inspection, no violations were observed. The management meeting held on December 4, 1985, was productive in informing us of the progress made by your staff and Corporate Engineering in addressing the Quality Assurance and Quality Control concerns identified in the last Systematic Assessment of Licensee Performance (SALP) Report. We appreciate and encourage your efforts to keep us apprised of your progress in this area.

Your cooperation is appreciated.

Sincerely,
