Subject: [External_Sender] Re: control number 599671, question A4

Hi Lymari,
Thank You for Your response. This is correct - ICSIHG-1 is the only model to be injection molded of 4140 low alloy steel.
Best,
Yelena

Hi Yelena,

If the model ICSIHG-1 is the only model made of 4140 low alloy steel, then the question is satisfied. Just indicate that only model ICSIHG-1 will use the new alloy.

Thanks,

Lymari

Subject: [External_Sender] control number 599671, question A4

Hi Lymari,

We (Advanced Combat Solutions Inc.) have just recently received a request for additional information (ref control number 599671).

We are somewhat confused by the question A4. It says "please provide a rationale for not performing prototype testing on devices constructed from 4140 steel". However we did do the prototype testing for the model ICSIHG-1 and provided its results in the Attachment 6 to our Request for Amendment. Please kindly confirm you have this attachment. If confirmed, please let me know if anything else is required to close the question A4.

Thank You!

All the best,

Yelena
