Mr. John Maier
Vice President
Electric and Steam Production
Rochester Gas & Electric Corporation
89 East Avenue
Rochester, New York 14649

Dear Mr. Maier:

Your submittal of March 23, 1982 requested that the NRC staff approve Rochester Gas & Electric Corporation's (RG&E) plan to remove 24 structurally degraded tubes from the Ginna "B" steam generator. The sections to be removed extend from immediately above the tube sheet to just below the first support plate.

Based on the information in your submittal and the information presented at a meeting with members of the NRC staff on March 23, 1982, we concur with RG&E's plan as described in the March 23, 1982 letter. We also understand that the removal of a limited number of other tubes might be necessary in order to gain access to the tubes requiring removal. If this should be the case we request that we be informed prior to the removal of such tubes.

Sincerely,

Original signed by

Dennis M. Crutchfield, Chief
Operating Reactors Branch #5
Division of Licensing
