LICENSEE: The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows: 1. Based on the inspection findings, no violations were identified. 2. Previous violation(s) closed. 3. The violations(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise									
	discretion, were satisfied. Non-cited violation(s) were discussed involving the following requirement(s):								
cited in ac with 10 C	s and Corrective Actions)	cy. This form is a No	OTICE OF VIOLATION, which m						
Statement of Corrective Actions I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.									
	ance will be achieved). I understand t	nat no further writte	n response to NRC will be require	ed, unless specifically re	DATE

PROGRAM SCOPE									
This was an unannounced escalated enforcement followup inspection of the Tilden Mine, which was authorized to use									
radioactive material in a variety of fixed process gauges. The purpose of this inspection was to verify the completion									
				rements identified during a					
				ult of that inspection, the NRC					
•	• ,	, 2017, imposing a	dditional conditions on t	he licensee in lieu of other					
escalated enforcement action.									
PERFORMANCE OBSERVATIONS:									
The inspector confirmed that the licensee had taken corrective actions as documented in the inspection report, and discussed with the licensee its plans for complying with the additional conditions in the CO. The inspector found no									
additional examples of the violations previously identified. Some of the violations are therefore closed; the others									
appeared to be on track for completion and closure at the agreed-upon schedule as required by the CO.									
No additional violations of NRC requirements were identified as a result of this inspection.
