

UNITED STATES NUCLEAR REGULATORY COMMISSIONDOCKET NO. 50-244ROCHESTER GAS & ELECTRIC CORPORATIONSYSTEMATIC EVALUATION PROGRAMNOTICE OF AVAILABILITY OF DRAFT INTEGRATED PLANT SAFETY ASSESSMENT REPORTFOR THER. E. GINNA NUCLEAR POWER PLANT

The Nuclear Regulatory Commission's (NRC) Office of Nuclear Reactor Regulation (NRR) has published its Draft Integrated Plant Safety Assessment Report related to Rochester Gas and Electric Corporation's R. E. Ginna Nuclear Power Plant in Wayne County, New York.

The report documents the review completed under the Systematic Evaluation Program (SEP). The SEP was initiated by the NRC to review the design of older operating nuclear reactor plants to reconfirm and document their safety. The review has provided for (1) an assessment of the significance of differences between current technical positions on safety issues and those that existed when the Ginna Plant was licensed, (2) a basis for deciding on how these differences should be resolved in an integrated plant review, and (3) a documented evaluation of plant safety. Equipment and procedural changes have been identified as a result of the review. It is expected that this report will be one of the bases in considering the conversion of the provisional operating license to a full-term operating license.

The report is being referred to the Advisory Committee on Reactor Safeguards and is being made available at the NRC's Public Document Room,
