Mr. Tran,

I have received the hard copy of amendment 28 for SNM-1826.

During my documentation review I noticed that condition 10 has incorrect references for the isotopes used in each device. This does not appear to be a new error for Amendment 28, but rather an error that has been overlooked since amendment 21.

Can we correct the error now? If so I will send you the information upon your reply.

Thank you,

Kimberly
