

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

In the Matter of)
)
Rochester Gas and Electric Corporation) Docket No. 50-244
(R. E. Ginna Nuclear Power Plant,)
Unit No. 1))

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U.S. Nuclear Regulatory Commission (the "Commission"), Rochester Gas and Electric Corporation ("RG&E"), holder of Provisional Operating License No. DPR-18, hereby requests that Sections 3.13, and 4.14 be revised in the Technical Specifications set forth in Appendix A to that license. RG&E also requests that the Inservice Inspection Program be revised. This request for a change in Technical Specifications and in the Inservice Inspection Program is submitted in response to a letter dated March 23, 1981 from Mr. Darrell G. Eisenhut, Director, Division of Licensing regarding Technical Specifications for safety-related snubbers.

The proposed technical specification change is set forth in Attachment A to this Application. The proposed Inservice Inspection Program change is set forth in Attachment B. A safety evaluation is set forth in Attachment C. This evaluation also demonstrates that the proposed change does not involve a significant change in the types or a significant increase in the amounts of effluents or any change in the authorized power level of the facility. The proposed changes have been clearly identified as an NRC position in the referenced letter. Therefore, this change is a Class III amendment in accordance with 10 C.F.R. Section 170.22. A check for four thousand dollars (\$4,000.00) is enclosed.
