

Docket No. 50-244  
LS05-81-02-018

February 11, 1981

Mr. John E. Maier, Vice President  
Electric and Steam Production  
Rochester Gas and Electric Company  
89 East Avenue  
Rochester, New York 14649

Dear Mr. Maier:

SUBJECT: ENVIRONMENTAL QUALIFICATION OF SAFETY-RELATED ELECTRICAL EQUIPMENT

RE: R. E. GINNA NUCLEAR POWER PLANT

Reference: Order for Modification of License Concerning the Environmental Qualification of Safety-Related Electrical Equipment, October 24, 1980.

This letter transmits the preliminary results of our review of environmental qualifications of safety-related electrical equipment at your facility. This evaluation was based on your submittals received over the past months.

The facility license was modified by the referenced Order of October 24, 1980, to require that all safety-related electrical equipment be qualified to specified requirements not later than June 30, 1982. In addition, the Order noted that a licensee is obligated to modify or replace inadequate equipment promptly.

The staff's review of your submittals has resulted in our identifying a number of potential equipment deficiencies involving a lack of proper documentation, inadequate justification of assumed environmental conditions following an accident, and/or inadequate environmental testing of equipment, such that conformance to the DOR guidelines, as required by the Order, cannot be demonstrated. You are requested to review our identified deficiencies, and their ramifications, and provide us your overall finding regarding continued safe operation of your facility. Accordingly, in order to determine whether your license should be modified or suspended, you are required pursuant to 10 CFR 50.54(f), to provide within 10 days of receipt of this letter, a written statement, signed under oath or affirmation supporting the safe operation of your facility, that takes into account the NRC staff's preliminary list of deficiencies.

February 11, 1981

The purpose of this statement is to provide the NRC with needed assurance, by the licensee, regarding the continued safety of the facility until you can provide an item-by-item reevaluation in a detailed documented manner at a later date. A negative finding on your part concerning the safety of continued operation would result in a unit shutdown, and should be reported as a Licensee Event Report (LER) within twenty-four (24) hours of the determination to the appropriate NRC Regional Office. Include in the LER the actions you have taken for the immediate resolution of the matter. A copy of any such LER should be sent to the Director, Division of Licensing, Office of Nuclear Reactor Regulation.

Please submit a copy of your reply to us via telecopy.

Sincerely,

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is essential for ensuring the integrity of the financial system and for providing a clear audit trail. The text also mentions the need for regular audits and the role of independent auditors in this process.

In addition, the document highlights the significance of transparency and accountability in financial reporting. It states that stakeholders, including investors and the public, have a right to know how their money is being managed and what the results are. This requires a high level of disclosure and a commitment to ethical standards.

The second part of the document focuses on the implementation of these principles. It provides a detailed overview of the various mechanisms and controls that are in place to ensure compliance. This includes the establishment of internal control systems, the implementation of risk management frameworks, and the use of technology to enhance data accuracy and security. The text also discusses the importance of training and education for all employees involved in financial operations.

Furthermore, the document addresses the challenges faced by organizations in achieving these goals. It identifies common pitfalls, such as inadequate oversight and a lack of communication, and offers practical advice on how to overcome them. It stresses that a strong culture of integrity and a clear line of responsibility are fundamental to successful financial management.

Finally, the document concludes by reiterating the commitment to high standards of financial reporting and the ongoing nature of this effort. It calls for continued vigilance and a willingness to adapt to changing circumstances and emerging risks. The goal is to ensure that the financial system remains robust, reliable, and capable of supporting the economic growth and stability of the country.
