

UNITED STATES NUCLEAR REGULATORY COMMISSIONDOCKET NO. 50-244ROCHESTER GAS AND ELECTRIC CORPORATIONNOTICE OF ISSUANCE OF AMENDMENT TO PROVISIONAL
OPERATING LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 39 to Provisional Operating License No. DPR-18, issued to Rochester Gas and Electric Corporation (the licensee), which revised the Technical Specifications for operation of the R. E. Ginna Nuclear Power Plant (the facility) located in Wayne County, New York. The amendment is to become effective June 30, 1981.

The amendment modifies the Technical Specifications to reflect modifications of the Fire Protection System being completed at the facility.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR §51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

12. NRC FEE DETERMINATION

The above application has been reviewed in accordance with Section 170.22 of Part 170 and is properly categorized.
 The above application has been reviewed in accordance with Section 170.22 of Part 170 and is incorrectly classified. Fee should be classes).

JUSTIFICATION FOR CLASSIFICATION OR RECLASSIFICATION

This submittal does not require a fee. Modifications have been previously reviewed and approved by NRC and these changes are the concluding portion of that review and not a request for a new review.

This application is a Class _____ type of action and is exempt from fees because it is:
 Filed by a nonprofit educational institution
 Filed by a Government agency and is not for a power reactor.
 For a Class I, II, or III amendment which results from an NRC request dated _____ for the application and the amendment to simplify or clarify License or Technical Specifications, has only minor safety significance, and is being issued for the convenience of NRC (must meet all of the criteria).
