ATTN: Mr. Roger W. Kober
Vice President
Electric and Steam Production
49 East Avenue
Rochester, New York 14649

Gentlemen:

Subject: Inspection No. 50-244/87-23

This refers to the inspection conducted by Mr. T. Koshy of this office on September 28 - October 2, 1987 at R. E. Ginna Power Station and your corporate office at Rochester, New York of activities authorized by NRC License No. DPR-18 and to the discussions of our findings held by Mr. T. Koshy with Mr. B. A. Snow at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Based on the results of this inspection, it appears that one of your activities was not conducted in full compliance with NRC requirements, as set forth in the Notice of Violation, enclosed herewith as Appendix A. This violation has been categorized by severity level in accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (Enforcement Policy). You are required to respond to this letter and in preparing your response, you should follow the instructions in Appendix A.

During the inspection, the inspector observed several discrepancies in the DC power system electrical fuses. Your program to resolve these problems was reviewed by the inspector. Additionally, our staff reviewed your commitments in letter dated October 21, 1987 on the replacement of DC fuses, Voltage regulation study, etc. These items are further discussed in Sections 4.2, 4.4 and 4.5.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
