Subject: LER 89-016 (Revision 01), Due To a Design Deficiency
The Failure of the SI Block/Unblock Switch Could
Render Some Automatic Actuation Features of Both
Trains of SI Inoperable
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

In accordance with 10 CFR 50.73, Licensee Event Report System, item (a)(2)(v)(D) and (a)(2)(vi), which requires a report of, "any event or condition that alone could have prevented the fulfillment of the safety function of structures or systems that are needed to mitigate the consequences of an accident", and in accordance with 10 CFR 21, "Reporting of Defects and Noncompliances", the attached Licensee Event Report LER 89-016 (Revision 01) is hereby submitted. This revision is necessary to correct the event date on page 1.

Due to the date of the original installation (1969), the condition is technically not 10 CFR 21 reportable. However, due to the potential significance of the failure scenario, Rochester Gas & Electric is submitting voluntary notification. Specific information regarding failure identification and corrective actions can be obtained from Mr. Richard A. Baker, Electrical Engineering, on (716) 546-2700.

This event has in no way affected the public's health and safety.

Very truly yours,
Robert C. Mccredy
