Gentlemen:

Subject: Inspection 50-244/90-02 (01/09/90 - 02/20/90)

This refers to the routine safety inspection conducted on January 9 through February 20, 1990, at the R. E. Ginna nuclear power plant by NRC Region I. At the end of the inspection period, Messrs. C. Marschall and N. Perry of my staff discussed the inspection findings with Mr. S. Spector and other members of your staff.

As set forth in the enclosed Notice of Violation, RG&E personnel failed to promptly correct an inadequate method for verifying position of the steam admission check valves in the auxiliary feedwater system. The resident inspectors questioned the adequacy of this method of verification during a previous surveillance in December 1989, but the concern was not appropriately addressed. Please respond to this violation as specified in Enclosure 1.

Your cooperation is appreciated.

Sincerely,

ORIGINAL SIGNED BY:

Jon R. Johnson, Chief  
Projects Branch 3  
Division of Reactor Projects
