

DEC 11 1990

Docket No. 50-244

Rochester Gas and Electric Corporation
ATTN: Mr. Robert C. Mecredy
Vice President
Ginna Nuclear Production
89 East Avenue
Rochester, New York 14649

Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP) Final Report
Number 50-244/89-99

This letter forwards the final R. E. Ginna Nuclear Power Plant SALP Report (Enclosure 1) for the period June 1, 1989 to September 30, 1990. The initial SALP Report was forwarded to you by our October 26, 1990 letter and was discussed with you and your staff at a public meeting held at your onsite training facility on November 20, 1990 (See Enclosure 2 for a list of attendees).

We have received your November 27, 1990 letter commenting on the SALP (Enclosure 3) and noted your constructive responses. Based upon our evaluation of these comments, we concluded that a clarification to the initial Ginna SALP Report was warranted. In Section III.B.1, we have amended the Radiological Controls analysis to correctly state the finding that quality control procedures were deficient in the Environmental Laboratory, not the Radiochemistry Laboratory. However, the SALP ratings did not change.

Our overall assessment of the R. E. Ginna Nuclear Power Plant found safe and conservative performance with general improvements in staffing, training, procedure adherence, and housekeeping.

No reply to this letter is required. Your cooperation with us in the SALP process is appreciated.

Sincerely,

Original Signed By:
Thomas T. Martin
