Subject: Rochester Gas and Electric Corporation
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

References: a) License No. DPR-18 (Docket No. 50-244)
b) Proposed Revision to R. E. Ginna Nuclear Power Plant Technical Specifications

Dear Mr. Johnson:

Enclosed is an Application for Amendment to Operating License to amend Appendix A of that license to provide clarification of which quality assurance activities are subject to audit considerations, through reference to the NRC endorsed Quality Assurance Program for R. E. Ginna Nuclear Power Plant.

The proposed amendment also changes the audit frequency, described in Technical Specification 6.5.2.8d, from "at least once per year" to "at least once per 24 months." This proposed change is consistent with the required audit frequency of 24 months identified in NUREG-0452, "Standard Technical Specifications for Westinghouse Pressurized Water Reactors."

This proposed Amendment should be considered effective 30 days after RG&E receipt of NRC approval.

Very truly yours,

Robert C. Mecredy
