Subject: RG&E's April 18, 1991 Response to Generic Letter 90-06
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Johnson:

In our April 18, 1991 letter to the NRC regarding response to Generic Letter 90-06, it was stated that additional work would be performed on the PORVs/control circuits to meet EQ conditions during the 1991 Refueling Outage (see item b of "RG&E's Proposed Position" on page 1 of the comparison table attached to the response). This is a typographical error. Present plans are to perform this work during the 1992 Refueling Outage. We apologize for any inconvenience this error may have caused during the NRC review process.

Very truly yours,

Robert C. Mecredy
