Docket No. 50-244

Rochester Gas and Electric Corporation (RG&E)
ATTN: Dr. Robert C. Mecredy
Vice President, Ginna Nuclear Production
89 East Avenue
Rochester, New York 14649

Dear Dr. Mecredy:

Subject: R. E. Ginna Resident Inspection 50-244/91-27 (11/5/91 - 12/9/91)

From November 5 to December 9, 1991, the NRC Region I staff conducted a routine safety inspection at your facility. We have documented the results in the enclosed report. At the end of the inspection, Mr. T. Moslak of my staff summarized the findings with Mr. J. Widay and other members of your staff.

Within this scope, the skill demonstrated by operators in response to challenges to plant stability from malfunctions of the feedwater and turbine control systems and automatic rod control system was noteworthy. Also, the support provided by the site engineering staff in identifying and resolving the cause of electrical interferences in the feedwater control system was effective. No violations or programmatic weaknesses were identified.

No response to this letter is required. Thank you for your cooperation.

Sincerely,

Original Signed By:
James C. Linville
