Docket No. 50-244

Ref. (a): Federal Register Vol. 51, No. 215, dated November 6, 1986

Dear Mr. Johnson:

Enclosed is an Application for Amendment to Operating License No. DPR-18 to amend Appendix A of that license to revise Ginna Technical Specifications 6.9.1.2 and 6.9.2.5. By reference (a) the Nuclear Regulatory Commission (NRC) amended 10CFR50.4 which establishes procedures for submitting correspondence, reports, applications, or other written communications and specify the number of copies required by the NRC. The final rule authorized pen-and-ink changes to licensees' technical specifications. Although the Commission does not expect formal applications for amendments, this application is submitted for the purpose of removing marked-up changes to the Technical Specifications and providing an auditable trail for the authorized changes.

Very truly yours,

*Robert C. Mecredy*
