

MAR 26 1992

Docket No. 50-244

Rochester Gas and Electric Corporation (RG&E)
ATTN: Dr. Robert C. Mecredy
Vice President, Ginna Nuclear Production
89 East Avenue
Rochester, New York 14649

Dear Dr. Mecredy:

Subject: R. E. Ginna Resident Inspection 50-244/92-02 (1/19/92 - 3/9/92)

This letter transmits the January 19 through March 9, 1992 inspection findings of Messrs. T. Moslak and E. Knutson at the R. E. Ginna Nuclear Power Plant. At the end of the inspection, Mr. T. Moslak of my staff summarized the findings with you and other members of your staff.

The inspection examined the control of operations, maintenance activities, and engineering support conducted during this period. Within this scope, the comprehensive actions taken to identify the causes of the two reactor trips which occurred during this period were noteworthy.

The NRR staff recently completed a review of the Service Water System Operational Performance Inspection Report (50-244/91-201) for the inspection conducted December 2 through 20, 1991. Based on this review, it appears that certain of your activities were not conducted in full compliance with NRC requirements as set forth in the enclosed Notice of Violation. Please respond to this Notice of Violation and in preparing your response, follow the instructions in the Notice. These violations are of concern because they represent ineffective control of engineering on safety-related equipment.

Your cooperation is appreciated.

Sincerely,

Original Signed By:
James C. Linville
