Subject: Rochester Gas and Electric Corporation
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Johnson:

Enclosed is an Application for Amendment to Operating License No. DPR-18 to amend the license and Appendix A of that license pursuant to the guidance provided in Generic Letters 86-10 and 88-12. This proposed amendment will (1) institute the standard license condition for the Fire Protection Program, (2) removes requirements for fire protection systems from Technical Specifications (TS), (3) remove fire brigade staffing requirements from TS, and (4) add administrative controls to TS that are consistent with those for other programs implemented by the license condition. The submittal includes the update to the updated Final Safety Analysis Report (UFSAR) as a result of these changes. This proposed amendment is considered to be an improvement to the Technical Specifications.

This proposed Amendment should be considered effective 90 days after RG&E receipt of NRC approval to allow sufficient time for implementation of plant procedures.

Very truly yours,

Robert C. Mecreddy
