

MAY 20 1992

Docket No. 50-244

Dr. Robert C. Mecredy
Vice President, Ginna Nuclear Production
Rochester Gas and Electric Corporation
89 East Avenue
Rochester, New York 14649

Dear Dr. Mecredy:

Subject: NRC Inspection No. 50-244/92-05

An unannounced safety inspection of the radiological controls program at your facility was conducted by J. Noggle on April 27 - May 1, 1992 of activities authorized by License No. DPR-18. The inspection involved review of areas important to worker health and safety. The inspection findings were discussed with members of your staff on May 1, 1992. This inspection focused on job coverage during outage conditions and related concerns.

Health physics coverage of outage work activities was generally strong. A good level of dedicated HP surveillance of work activities was evident. There was good preplanning and dose minimization results with respect to steam generator maintenance and insulation replacement activities. Special Work Permits were generally well written and complied with. Areas for enhancement were noted in the design of the HP staytime calculation record, shielding optimization, and currency of the MPC-hour tracking log.

Within the scope of this inspection no violations were identified. No response to this letter is required.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:
