Dear Dr. Mecredy:

SUBJECT: Inspection No. 50-244/93-04

This letter refers to the inspection conducted by Ms. Laurie Peluso and Dr. Jason Jang of this office on February 8-12, 1993, of activities authorized by NRC License No. DPR-18 at the R. E. Ginna Nuclear Power Plant, Ontario, New York and to the discussion of our findings held by Ms. Peluso and Dr. Jang with Mr. Marlow and other members of your staff at the conclusion of the inspection.

Areas examined during this inspection, involving your radiological environmental monitoring program and radioactive effluent control program, are important to public health and safety and are described in the NRC Region I Inspection Report that is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and independent observations by the inspector.

Within the scope of this inspection, your improvements of the radiological environmental monitoring and radioactive effluent control programs were noteworthy. We noted that the responsible individuals were knowledgeable with respect to implementation of the above programs. No safety concerns or violations of regulatory requirements were identified.
