Subject: Technical Specification Impact of the Analysis of Capsule "S" from the Rochester Gas and Electric Corporation R. E. Ginna Reactor Vessel Radiation Surveillance Program
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Ref.(a): Letter from R. C. Mecredy, RG&E, to A. R. Johnson, NRC, Subject: "Analysis of Capsule "S" from the Rochester Gas and Electric Corporation R. E. Ginna Reactor Vessel Radiation Surveillance Program WCAP-13902 December 1993" dated March 29, 1994.

Dear Mr. Johnson:

The referenced letter discussed the potential for a Technical Specification change based upon an analysis of the Capsule "S" results for the R. E. Ginna Nuclear Plant reactor vessel. As presented in that letter, it was expected that an evaluation as to the impact on the Technical Specifications would be completed by the end of May 1994. Due to schedule complications with the NSSS vendor, completion of this effort is not expected until July 29, 1994.

Very truly yours,

Robert C. Mecredy
