

Dr. Robert C. Mecredy
Vice President, Nuclear Production
Rochester Gas and Electric Corporation
89 East Avenue
Rochester, New York 14649

Dear Dr. Mecredy:

SUBJECT: EXTENSION OF GENERIC LETTER 89-10 PROGRAM SCHEDULE
(TAC NO. M89202)

On May 27, 1994, you submitted a letter providing the current status of the Ginna motor-operated valve (MOV) program developed in response to Generic Letter (GL) 89-10, "Safety-Related Motor-Operated Valve Testing and Surveillance," for the Ginna Nuclear Power Plant. In the May 27 letter, you also requested an extension to the Ginna MOV program beyond the currently committed schedule provided to the NRC on December 28, 1989, in response to GL 89-10.

You originally committed to complete your testing program, in response to GL 89-10, within the recommended schedule of June 28, 1994. In your May 27 letter, you requested an extension of your GL 89-10 program to June 28, 1995.

The NRC staff found your May 27 letter contained sufficient information to conduct a meaningful review and was formatted consistent with the guidance for extension requests provided in GL 89-10, Supplement 6. A conference call was conducted with your representatives, members of the NRC Region I staff, and members of the NRR staff on July 14, 1994, to discuss questions that had arisen during the review of your May 27 letter. All questions were answered to the satisfaction of the NRR and Region I participants. Accordingly, the staff accepts the GL 89-10 program extension as requested in your May 27, 1994, letter.

This closes TAC No. M89202.

Sincerely,

Original signed by:

Allen R. Johnson, Project Manager
