NOV 1 1994

Dr. Robert C. Mecredy  
Vice President, Ginna Nuclear Production  
Rochester Gas and Electric Corporation  
89 East Avenue  
Rochester, New York 14649

Dear Dr. Mecredy:

SUBJECT: REQUALIFICATION PROGRAM INSPECTION - GINNA INSPECTION REPORT  
50-244/94-23

This letter transmits the findings of an inspection of licensed operator requalification training conducted by J. Stewart and K. Erickson from October 3 to 7, 1994, at the R. E. Ginna Nuclear Power Plant. The inspection was conducted to verify that the Ginna requalification program for licensed operators ensured safe power plant operation by adequately evaluating how well individual operators and crews have mastered training and performance objectives. The inspection findings were based on observations of activities, interviews, document reviews, and were discussed with J. Widay and other members of your staff at the conclusion of the inspection.

Overall, the licensed operator training and requalification programs were determined to be very good. A review of recent operational performance shows that the training and requalification programs have been effective in ensuring continued safe operation of the facility.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

No reply to this letter is required, but should you have any questions regarding this inspection, please contact me at 610-337-5211.

Sincerely,

Original Signed By:  
Glenn W. Meyer

Glenn W. Meyer, Chief  
BWR and PWR Sections  
Division of Reactor Safety
