Dr. Robert C. Mecredy  
Vice President, Ginna Nuclear Operations  
Rochester Gas and Electric Corporation  
89 East Avenue  
Rochester, New York 14649

SUBJECT: NRC INSPECTION 50-244/95-08 |

Dear Dr. Mecredy:

This letter transmits the March 12, 1995 to May 6, 1995 inspection findings of Messrs. T. Moslak, E. Knutson and other Regional staff at the R. E. Ginna Nuclear Power Plant. At the end of the inspection, the findings were discussed with Mr. J. Widay and other members of your staff.

The inspection was focused on areas relevant to public health and safety and examined the control of operations, maintenance, engineering, and plant support activities conducted during the Cycle 25 annual refueling and maintenance outage. Within this scope, no violations were identified.

Particularly noteworthy was the excellent coordination between outage management, the work control center, and the control room staff to assess and reduce shutdown risks. The Plant Operations Review Committee was found to provide prompt, conservative, assessments of plant events and emergent operational issues. The significant reduction in personnel exposure achieved during this outage reflects a well structured, integrated planning effort, and strong management support for the ALARA principle.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

No response to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:

James C. Linville, Chief  
Projects Branch No. 3  
Division of Reactor Projects
