

October 20, 1995

Dr. Robert C. Mecredy  
Vice President, Ginna Nuclear Production  
Rochester Gas and Electric Corporation  
89 East Avenue  
Rochester, NY 14649

SUBJECT: NRC INSPECTION NO. 50-244/95-18

Dear Dr. Mecredy:

This letter refers to the safety inspection conducted by Mr. James Kottan and Ms. Nancy McNamara of this office on October 2-6, 1995, of activities authorized by NRC License No. DPR-18 at the R. E. Ginna Nuclear Generating Station, Ontario, New York, and to the discussions of our findings held by Mr. Kottan and Ms. McNamara with Mr. J. Widay and other members of your staff.

Areas examined during this inspection are important to public health and safety and are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

In addition, our Mobile Laboratory was brought to your site and used by the inspector to make certain independent measurements. The basic purpose of these independent measurements is to verify your capability for analyzing radioactive effluents, and to achieve and maintain comparable methods of analyses between your facility and the NRC. The data from these measurements are included in this report with the exception of the wet radiochemistry results, which will be documented in a subsequent inspection report.

Within the scope of this inspection, you had in place effective programs for measuring radioactivity in process and effluent samples. No violations of regulatory requirements were observed and no response to this letter is required.

Sincerely,

9510270044 951020
