Dr. Robert C. Mecredy
Vice President, Ginna Nuclear Operations
Rochester Gas and Electric Corporation
89 East Avenue
Rochester, New York 14649

SUBJECT: NRC INTEGRATED INSPECTION REPORT 50-244/98-08

Dear Dr. Mecredy:

This letter transmits the results of safety inspections conducted by NRC inspectors at the Ginna Nuclear Power Plant from June 22 through July 26, 1998. At the conclusion of the inspection, the findings were discussed with Mr. J. Widay and others of your staff.

During the five week period covered by this inspection period, we noted safe and sustained stable plant operation. We also noted the corrective action program was effectively used to identify, evaluate, and resolve radiological deficiencies, and that you made good enhancements to the program regarding operability determinations and tracking corrective actions. We concluded that your efforts to reduce radiation exposure have been successful as evidenced by the steadily declining annual total and three-year rolling average radiation exposures.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room (PDR).

Sincerely,

Original Signed by:

Lawrence T. Doerflein, Chief
Projects Branch 1
Division of Reactor Projects
