Subject: RE: Request for Deferral of the Response due date for the STC RAI's received on 8.10.17
Date: Friday, September 22, 2017 11:23:30 AM

Bob,

As we discussed, the NRC staff's review schedule supporting the projected review completion date of December 2017 was based on a 30-day RAI-response period. As follow-on to my message below, while the NRC staff approves your requested RAI response extension to October 3, 2017, please note that the additional time requested exceeding 30 days may delay the completion of the amendment review. Please consider this message as documentation of our discussion confirming that the initial forecasted completion date of December 2017 has been adjusted to January 2018.

The staff looks forward to receiving the RAI response by October 3rd, and will continue to work expeditiously towards meeting the licensee's request date, if possible. I will keep you informed of the progress of our review. Any question/concerns, please contact me.

Thanks,

~~~~~  
Rich Guzman

**Subject:** RE: Request for Deferral of the Response due date for the STC RAI's received on 8.10.17

Mahvash,

This e-mail response confirms receipt of your (below) September 14, 2017, request for an extension for your response to the subject Nuclear Regulatory Commission (NRC) Request for Additional Information (RAI) (ADAMS Accession No. ML17219A106). Based on the justification and remaining steps to complete the RAI response that was provided in your request, your RAI response date has been extended to October 3, 2017.

This message will be added to ADAMS and made an official agency record as documentation of this approved request.

Subject: [External_Sender] Request for Deferral of the Response due date for the STC RAI's received on 8.10.17

Rich,

In follow-up with Bob Walpole's phone conversation with you earlier today, please consider this email as a formal request for the deferral of the "Response due date of September 18, 2017" for the attached STC RAI's received on August 10, 2017.

The deferral of the due date is required to allow enough turn-around time for the following to be performed in a quality manner:

1. Availability of Subject matter Experts (SMEs) in the three areas of "Thermal. Shielding/Radiation Protection, and criticality" for addressing the RAI's due to vacation time
2. Availability of Subject matter Experts (SMEs) in the three areas of "Thermal. Shielding/Radiation Protection, and criticality" for the review of the responses provided in item 1
3. Revision of the responses provided in item 1 based on comments received under item 2
4. Review and acceptance of the revised responses by the SMEs
5. Update of licensing Report, Thermal and Shielding report to reflect responses to the RAIs

To address items 1-5 above, we request your approval for the deferral of the due date of September 18, 2017 to October 3, 2017, i.e., extending the 45-day response time, as noted in your the NRC letter (ML17219A106) to 60-days.

Thanks,

Mahvash Mirzai
