REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

SEP 28 2017

John Zehner, R.Ph.  
Radiation Safety Officer  
Zevacor Molecular  
14395 Bergen Blvd.  
Noblesville, IN 46060

Dear Mr. Zehner:

Enclosed is Amendment No. 02 to your NRC Materials License No. 13-35179-02 in accordance with your request dated July 11, 2017.

As requested in letter dated July 11, 2017, we have transferred the pharmacy area of use in Noblesville, Indiana, that was under NRC License No. 24-32827-01MD to become part of the approved area of use already under your license for research and development purposes. Also, possession limits in Items 8.J., K. and L. were increased to accommodate the sources that were transferred to your license from the aforementioned NRC license.

Please note that your license is now in landscape format. Also, several conditions were revised to conform with current NRC policy. These are primarily Conditions 11, 12, 19 and 21. Also please note that previous Condition 19 (regarding transportation) was removed as this is a regulation and is noted in the preamble of the license.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U. S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

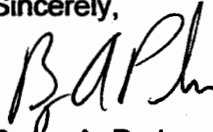

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We

strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 of the *Code of Federal Regulations* Section 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>

Sincerely,

A handwritten signature in black ink, appearing to read 'BAPh', is written over the typed name.
